

d-com · Wrong Tests First

Magic command

```
cd cloud-sdk-java/<module>
mvn test-order:affected test
```

Numbers

cold $\approx$ **88s** · warm $\approx$ **55s**
red: Selected **8** (7+1), defer 7
green: Selected **7** (7), defer 8
“about half the tests”

Fix the bug (Copilot)

prompt: *fix the bug* + paste error
agent runs affected → **green**

Share with a colleague

```
mvn test-order:diagnose
mvn test-order:export-json
```

Reset / between runs

```
./reset.sh
./add-test-order.sh
./make-change.sh
```

Ignore on stage (noisy WARNs)

- Static-analysis fallback
- “N tests were NOT selected”
- Surefire excludes
- OData generator warnings

Fallbacks

nuclear: reset → add → change
no wifi: cp -R .prepared-test-order .test-order
